

Fossil Fuel Focus

MKC Invest Fossil Fuel Focus 4
November 2024

Portfolio Objective:

Inception Date: 02.01.24

The MKC Invest Fossil Fuel Focus portfolio 4 aims to provide long-term capital growth from a diversified portfolio of collective investments. All selected holdings will be mandated to reduce meaningfully their underlying exposures to primary ("Scope 1") fossil fuel emissions, accepting that all listed businesses are likely to produce emissions in some forms. The portfolio will be managed such that its overall level of investment risk will be suitable for, and in line with the expectations of, an investor at level 4 on the MKC "Baseline" scale of investment risk. The portfolio aims to outperform (net of any investment related costs but not necessarily net of any costs relating to advice or custody) this strategic asset allocation over the course of a market cycle through tactical active asset allocation and the selection of predominantly actively managed funds from a range of investment managers. The selection of such managers will be unconstrained to any particular firm(s) but must meet the Fossil Fuel Emissions criteria set out above.

60% Morningstar Global Core Bond (GBP) Hedged

Market Overview:

The re-election of Donald Trump was the catalyst for a solid month for US equities with the prospect of lower tax viewed as a positive for US companies. Other regions saw more varied returns as the prospect of tariffs and a wider trade war weighed on investor sentiment.

The interest rate cutting cycle continued with both the Federal Reserve (US) and the Bank of England lowering policy rates, which came as an increase in inflation was causing the market to question the pace of future easing. Although bond yields moved lower in the latter half of the month, they remain well above the level seen at the end of the summer.

In the UK the aftermath of October's budget continued, again putting upwards pressure on bond yields. This situation was not improved when figures showed that GDP growth was just 0.1% for Q3 2024, well below the 0.5% figure for Q2.

The month ended with the French Prime Minister, Michel Barnier, attempting to get a deficit reducing budget through Parliament. This seems unlikely to happen meaning a vote of no confidence is a distinct possibility. The uncertainty caused French equities to fall and the spread (difference) between French and German debt to widen further.

Portfolio performance has been calculated using Morningstar Direct and is believed accurate based on the standard pricing of any underlying investment funds held in the portfolio. In some cases, clients may benefit from additional discounts to those same funds on their chosen custody platform. This will cause differences between actual performance and the performance calculated by Morningstar. We expect in all cases that these differences, where present, will be to investors' advantage.

Portfolio performance has been calculated using Morningstar Direct and is believed accurate based on the standard pricing of any underlying investment funds held in the portfolio. In some cases, clients may benefit from additional discounts to those same funds on their chosen custody platform. This will cause differences between actual performance and the performance calculated by Morningstar. We expect in all cases that these differences, where present, will be to investors' advantage.

Important Information:

The portfolio is run on a discretionary management basis by MKC Investment Management Ltd for advised clients of MKC Wealth Ltd only. MKC Investment Management Ltd is a discretionary investment firm authorised and regulated by the Financial Conduct Authority (FRN:966731). Registered in England No 13475203. Registered office Walsingham House, 35 Seething Lane, London, EC3N 4AH. MKC Investment Management Ltd and MKC Wealth Ltd are part of the same group of companies. This publication is for UK based retail investors who have engaged with MKC Wealth Ltd for their financial planning services. Distribution or sharing of this publication is not permitted without authorisation from MKC Investment Management Limited. MKC Investment Management Limited investment portfolios are only available to retail investors who have been provided with a personal recommendation to invest from their MKC Wealth financial adviser. The value of investment may go up and down and you may get back less than you invested. All assets are dominated in UK Sterling. The investment or investment service may not be suitable for all recipients of this publication. If in doubt speak to your MKC Wealth Financial Adviser.
