

MKC Invest Baseline Index 1
 January 2025

Portfolio Objective:

Inception Date: 02.01.2024

 MKC Wealth
 Risk Rating

Equity Target

Cautious

10%

The MKC Invest Baseline Index portfolio 1 aims to provide long-term capital growth from a portfolio of collective investments. The portfolio will be managed such that its overall level of investment risk will be suitable for, and in line with the expectations of, an investor at level 1 on the MKC "Baseline" scale of investment risk. The portfolio aims to track (net of any investment related costs but not necessarily net of any costs relating to advice or custody) this strategic asset allocation as closely as possible by selecting the minimum number of index tracking collective investments required to replicate, as closely as possible, the allocations of the benchmark. The selection of index-tracking collectives will be unconstrained to any particular firm(s).

Baseline Benchmark 1:
 10% Morningstar Global Target Market Exposure
 90% Morningstar Global Core Bond (GBP) Hedged

Market Overview:

Stock markets had a mixed start to the year, initially struggling before rallying strongly following President Trump's inauguration. Hopes that his pre-election rhetoric on tariffs might soften contributed to the rebound.

Unlike recent years, market leadership did not come from US mega-cap stocks but from previously underperforming sectors, such as consumer staples. This shift accelerated when Chinese firm DeepSeek unveiled a rival to US AI engines, claiming significantly lower development and energy costs. The news weighed on chip manufacturers, particularly Nvidia, which experienced another volatile month. Notably, it suffered the largest single-day dollar-value loss in market history, with a single-session decline of nearly 17%.

The UK stock market also performed well, closing at a record high. Sterling weakness, coupled with the relative cheapness of the FTSE compared to US markets, was a key driver. A similar trend played out across Europe, with most major indices posting gains.

In monetary policy, the European Central Bank cut interest rates, widening the gap in borrowing costs between the Eurozone, the UK, and the US. The Federal Reserve kept rates on hold, while the Bank of England had no policy meeting during the month. All eyes now turn to its next announcement on 6th February.

Balanced

60%

The MKC Invest Baseline Index portfolio 6 aims to provide long-term capital growth from a portfolio of collective investments. The portfolio will be managed such that its overall level of investment risk will be suitable for, and in line with the expectations of, an investor at level 6 on the MKC "Baseline" scale of investment risk. The portfolio aims to track (net of any investment related costs but not necessarily net of any costs relating to advice or custody) this strategic asset allocation as closely as possible by selecting the minimum number of index tracking collective investments required to replicate, as closely as possible, the allocations of the benchmark. The selection of index-tracking collectives will be unconstrained to any particular firm(s).

Baseline Benchmark 6:
 60% Morningstar Global Target Market Exposure
 40% Morningstar Global Core Bond (GBP) Hedged

Market Overview:

Stock markets had a mixed start to the year, initially struggling before rallying strongly following President Trump's inauguration. Hopes that his pre-election rhetoric on tariffs might soften contributed to the rebound.

Unlike recent years, market leadership did not come from US mega-cap stocks but from previously underperforming sectors, such as consumer staples. This shift accelerated when Chinese firm DeepSeek unveiled a rival to US AI engines, claiming significantly lower development and energy costs. The news weighed on chip manufacturers, particularly Nvidia, which experienced another volatile month. Notably, it suffered the largest single-day dollar-value loss in market history, with a single-session decline of nearly 17%.

The UK stock market also performed well, closing at a record high. Sterling weakness, coupled with the relative cheapness of the FTSE compared to US markets, was a key driver. A similar trend played out across Europe, with most major indices posting gains.

In monetary policy, the European Central Bank cut interest rates, widening the gap in borrowing costs between the Eurozone, the UK, and the US. The Federal Reserve kept rates on hold, while the Bank of England had no policy meeting during the month. All eyes now turn to its next announcement on 6th February.
