Portfolio Objective:

Inception Date: 02.01.2024

Cautious

10%

The MKC Invest Contemporary Active portfolio 1 aims to provide long-term capital growth from a diversified portfolio of collective investments. The portfolio will be managed such that its overall level of investment risk will be suitable for, and in line with the expectations of, an investor at level 1 on the MKC "Baseline" scale of investment risk. The portfolio aims to outperform (net of any investment related costs but not necessarily net of any costs relating to advice or custody) this strategic asset allocation over the course of a market cycle through tactical active asset allocation and the selection of a blend of both active and passive collectives from a range of investment managers. The portfolio will aim to have underlying investment costs of half that or less of the MKC Invest Classic Active range at any one time. The selection of managers will be unconstrained to any particular firm(s).

Baseline Benchmark 1:
10% Morningstar Global All Cap Target Market Exposure
90% Morningstar Global Core Bond (GBP) Hedged

Market Overview:

March was dominated by escalating conflict in the Middle East as the US and Israel attacked Iran in an attempt to force regime change.

The main consequence was an energy price shock, as oil and natural gas prices rose dramatically, leading to higher inflation. This changed the outlook for bond markets, with the US and UK moving from predicting cuts to forecasting up to three rate rises in the case of the UK. This move was reversed somewhat later in the month as concerns over economic growth gained traction, but yields were higher by the end of the month, resulting in a fall in bond prices.

Equity markets also fell, with the worst returns coming from net importers of oil such as the UK, Europe, and Asia. By comparison, US indices held up relatively well. The situation remains very much in flux, with extreme market moves being driven by the news flow.

Portfolio performance has been calculated using Morningstar Direct and is believed accurate based on the standard pricing of any underlying investment funds held in the portfolio. In some cases, clients may benefit from additional discounts to those same funds on their chosen custody platform. This will cause differences between actual performance and the performance calculated by Morningstar. We expect in all cases that these differences, where present, will be to investors' advantage.

Important Information:

The portfolio is run on a discretionary management basis by MKC Investment Management Ltd (trading as MKC Invest). MKC Investment Management Ltd is a discretionary investment firm authorised and regulated by the Financial Conduct Authority (FRN: 966731). Registered in England No 13475203. Registered office: Walsingham House, 35 Seething Lane, London, EC3N 4AH. Distribution or sharing of this publication is not permitted without authorisation from MKC Investment Management Limited. MKC Investment Management Limited investment portfolios are only available to retail investors who have been provided with a personal recommendation to invest from their financial adviser. The value of investment may go up and down and you may get back less than you invested. All assets are dominated in UK Sterling. The investment or investment service may not be suitable for all recipients of this publication.

This changed the outlook for bond markets, with the US and UK moving from predicting cuts to forecasting up to three rate rises in the case of the UK. This move was reversed somewhat later in the month as concerns over economic growth gained traction, but yields were higher by the end of the month, resulting in a fall in bond prices.

Equity markets also fell, with the worst returns coming from net importers of oil such as the UK, Europe, and Asia. By comparison, US indices held up relatively well. The situation remains very much in flux, with extreme market moves being driven by the news flow.

Contemporary Active

MKC Invest Contemporary Active 6
March 2026

Portfolio Objective:

Inception Date: 02.01.2024

MKC Wealth
Risk Rating

Equity Target

Balanced

60%

The MKC Invest Contemporary Active portfolio 6 aims to provide long-term capital growth from a diversified portfolio of collective investments. The portfolio will be managed such that its overall level of investment risk will be suitable for, and in line with the expectations of, an investor at level 6 on the MKC "Baseline" scale of investment risk. The portfolio aims to outperform (net of any investment related costs but not necessarily net of any costs relating to advice or custody) this strategic asset allocation over the course of a market cycle through tactical active asset allocation and the selection of a blend of both active and passive collectives from a range of investment managers. The portfolio will aim to have underlying investment costs of half that or less of the MKC Invest Classic Active range at any one time. The selection of managers will be unconstrained to any particular firm(s).

Baseline Benchmark 6:
60% Morningstar Global All Cap Target Market Exposure
40% Morningstar Global Core Bond (GBP) Hedged

Market Overview:

March was dominated by escalating conflict in the Middle East as the US and Israel attacked Iran in an attempt to force regime change.

The main consequence was an energy price shock, as oil and natural gas prices rose dramatically, leading to higher inflation. This changed the outlook for bond markets, with the US and UK moving from predicting cuts to forecasting up to three rate rises in the case of the UK. This move was reversed somewhat later in the month as concerns over economic growth gained traction, but yields were higher by the end of the month, resulting in a fall in bond prices.

Equity markets also fell, with the worst returns coming from net importers of oil such as the UK, Europe, and Asia. By comparison, US indices held up relatively well. The situation remains very much in flux, with extreme market moves being driven by the news flow.

Portfolio performance has been calculated using Morningstar Direct and is believed accurate based on the standard pricing of any underlying investment funds held in the portfolio. In some cases, clients may benefit from additional discounts to those same funds on their chosen custody platform. This will cause differences between actual performance and the performance calculated by Morningstar. We expect in all cases that these differences, where present, will be to investors' advantage.

Important Information:

The portfolio is run on a discretionary management basis by MKC Investment Management Ltd (trading as MKC Invest). MKC Investment Management Ltd is a discretionary investment firm authorised and regulated by the Financial Conduct Authority (FRN: 966731). Registered in England No 13475203. Registered office: Walsingham House, 35 Seething Lane, London, EC3N 4AH. Distribution or sharing of this publication is not permitted without authorisation from MKC Investment Management Limited. MKC Investment Management Limited investment portfolios are only available to retail investors who have been provided with a personal recommendation to invest from their financial adviser. The value of investment may go up and down and you may get back less than you invested. All assets are dominated in UK Sterling. The investment or investment service may not be suitable for all recipients of this publication.

Portfolio Objective:

Inception Date: 02.01.2024

MKC Wealth
Risk Rating

Equity Target

Adventurous

100%

The MKC Invest Contemporary Active portfolio 10 aims to provide long-term capital growth from a diversified portfolio of collective investments. The portfolio will be managed such that its overall level of investment risk will be suitable for, and in line with the expectations of, an investor at level 10 on the MKC "Baseline" scale of investment risk. The portfolio aims to outperform (net of any investment related costs but not necessarily net of any costs relating to advice or custody) this strategic asset allocation over the course of a market cycle through tactical active asset allocation and the selection of a blend of both active and passive collectives from a range of investment managers. The portfolio will aim to have underlying investment costs of half that or less of the MKC Invest Classic Active range at any one time. The selection of managers will be unconstrained to any particular firm(s).

Baseline Benchmark 10:
100% Morningstar Global All Cap Target Market Exposure

Market Overview:

March was dominated by escalating conflict in the Middle East as the US and Israel attacked Iran in an attempt to force regime change.

The main consequence was an energy price shock, as oil and natural gas prices rose dramatically, leading to higher inflation. This changed the outlook for bond markets, with the US and UK moving from predicting cuts to forecasting up to three rate rises in the case of the UK. This move was reversed somewhat later in the month as concerns over economic growth gained traction, but yields were higher by the end of the month, resulting in a fall in bond prices.

Equity markets also fell, with the worst returns coming from net importers of oil such as the UK, Europe, and Asia. By comparison, US indices held up relatively well. The situation remains very much in flux, with extreme market moves being driven by the news flow.
